

Lucy Wirth EEG interpretation

Hi Dr. Cotton,

Great EPOCH call yesterday, thank you for all you do!

I understand that you are interested in having copies of the EEG's that we've had done with Dr. Montgomery, so mine is attached.

Her comments, should you be interested: The amount of the increase in energy, the fullness and elongation of the segments, and how long it lasted - I was hooked up for 20 minutes and the increased energy was still indicated at the end of the 20 minutes. What amazed me was that I only took a few breaths at the start; being hooked up and in a reclining position it was a little challenging to do more, and to have these results! Quite wonderful to know!

Given the indication of brain trauma that resulted in this EEG, I've gone to her for the complete EEG analysis and in addition to her stating that HBL has helped with this, I am seeing her for some follow up neurofeedback.

Please let me know if there is any additional information you would like.

Thanks so much and have a wonderful day!!

Lucy
